CONCEPTUAL DESIGN SERVICES

■ Do you need to Modernize, Expand or Upgrade?

Where do you start? inoLECT offers Conceptual Design services that incorporate all goals of the site, as well as any safety or reliability concerns that may exist, in an all-inclusive package.

We provide solid design options with clear-cut verbal descriptions, along with diagrams and drawings for all phases of the project. We'll show you available design options and present valuable information for deciding the best option for your facility, from the very start.

DELIVERABLES:

- Clear, concise report including scope & goals
- Design solutions customized to your facility, with advantages & disadvantages of each to aid in decision making
- Detailed drawings illustrating the entire power system
- Per-item cost estimates, including installation & equipment
- Peace of mind about your facility's upgrades, from the very start.

inoLECT's Conceptual Designs give you confidence in the project from beginning to end.

Contact us for more information on our Conceptual Design Packages, & we'll help you get started down the path to a safe, efficient & reliable facility.
