

# ELECTRICAL SAFETY TRAINING

Courses can be taken onsite at your facility  
or at our campus in Baton Rouge, LA.

## ELECTRICAL SAFETY TRAINING

SAFE WORK PRACTICES BASED ON NFPA 70 E

## METER FOR LIFE

WHERE DO YOU MEASURE?

inoLECT offers a comprehensive training session based on the latest regulations released from NFPA 70E Standard for Electrical Safe Work Practices. Our course is compiled from official standards books, personal anecdotes and other reputable sources and presented in terms that are easily understood and relatable.

Course instructor, **Chris Ordes** is a certified Electrical Safety Compliance Professional and has over 30 years of experience with industrial power systems, electrical power distribution systems, automation and controls, and switchgear maintenance and repair. He leads a team responsible for start-up, commissioning and training on the universal remote racking device, the inoRAC®.

### Course Deliverables

- 8 Hour Course
- Course Workbook
- Digital copy of Presentation
- Certificate of Completion
- CEUs

### Course topics include:

- **Hazards of Electricity**
  - Electrical Shock
  - Electrical Arc Flash
  - Electrical Arc Blast
- **Electrical Safety Regulations and Standards**
  - OSHA
  - Overview of Regulations
- **De-Energized Work (LOTO)**
  - Confirming a System is De-energized
  - One-Line Diagrams
  - Lock-out/Tag-out
  - Re-energization
- **Energized Work**
  - Defining Energized
  - Electrical Hazard Risk Assessment
  - Protective Equipment and Tools
- **Personal Protective Equipment**
  - Electrical Protection Equipment
  - Arc Flash Protection Equipment
  - Energy Detection Equipment
