

SWITCHGEAR SERVICES

LV & MV Switchgear Services

A proactive preventative maintenance program for your low and medium voltage breakers is crucial to longevity in power distribution equipment at your facility. Without proper maintenance, companies run the risk of unscheduled outages, costly downtime and the possibility of injury to personnel.

Our Breaker Service Specialists offer years of valuable experience with maintenance, testing, repair and troubleshooting of power circuit breakers and deliver successful Strategies for breaker upgrades and maintenance.

Maintaining your electrical switchgear can provide:

- **Extended life of the switchgear**
- **Improved safety for your employees**
- **Increased reliability**
- **Reduction of operating and maintenance cost**

Regardless of the manufacturer, inoLECT can help improve the dependability of your breakers, extend their lifecycle, reduce cost to your business and increase safety.

Our Services:

- **In-shop Breaker Repairs**
- **LV & MV Breaker Refurbishment**
- **LV Breaker Retrofits**
- **Onsite Switchgear Maintenance & Testing**
- **Onsite Breaker Training**
- **New Equipment Commissioning**
- **Transformer Testing**
- **Cable Testing**
- **Thermal Imaging**
