

## Comprehensive Breaker-Specific Training Helps Your Staff Perform Their Jobs Safely

**You can never be too knowledgeable about the equipment you are working on and around.** inoLECT's team of highly knowledgeable circuit breaker technicians have years of hands-on experience troubleshooting, maintaining and repairing many types of power circuit breakers.

We can provide onsite breaker and switchgear training for maintenance and operations personnel that will better help them understand how their equipment works and how to work safely around any issues that could arise.
