

inoLECT RELAY RETROFITS

Do you have obsolete electromechanical relays?

Are you in need of upgrading existing equipment? inoLECT offers complete Relay Retrofit and Installation Packages, customized to your facility's needs. Our highly trained and experienced engineers oversee your job from beginning to project completion.

We deliver a complete, engineered product with all necessary documents & drawings. Our customers stay updated and informed about all work done, every step the way.

DELIVERABLES:

- Our experts are trained on installation and testing of relays from all major brands.
- inoLECT is the only Schweitzer Certified Gold Level Expert in the southern US.
- Engineers are onsite to complete the job as quickly and efficiently as possible.
- Assembly, wiring and testing is done at our facility to reduce your downtime.
- We perform Startup Test Reports and Function Test Reports onsite for all protective relay functions.
- Job Books are created containing management summary, text description of relay operation, time current curves, setting sheets and all modified drawings.

All Retrofit installs are tested & verified to ensure a complete working system is provided.
